This interactive map is a terrific tool.

Following the redistricting guidelines to create boundaries of contiguous communities with shared interests, I have a few suggestions that would make this a more useful process:

- 1) include an overlay that shows the boundaries of all incorporated cities and towns;
- 2) include a topographical overlay that shows natural boundaries, such as ridges, watersheds, and include open space, state and national parks;
- 3) include an overlay of special districts, i.e., school districts, sewer districts, etc.

Thank you for providing this opportunity to participate.
